Explanation: The purpose of this file is to include all necessary biblatex entries for the project from All.bib developed by Le Chen [Che23]. The bib file

Fox–H_biber.bib

is generated by running the following command:

```
> biber --output_format=bibtex --output_resolve Fox–H.bcf
> biber Fox_H
```

The *Fox H-function* plays a fundamental role in expressing the fundamental solutions to our equations. It is a generalization of the *Meijer G-function* (see Chapter 16 of [Olv+10]).

1. The ordinal paper: [Fox61];
2. Chapters 1 and 2 of [KS04];
3. Section 1.12 of [KST06];
4. Section 8.2 of [PBM90];
5. The books by Mathai and Saxea [MSH10; MS78];
6. The book by [EIK04];
7. About this repo: [CH23].

In the context of the stochastic partial differential equations (SPDEs), the Fox H-function is used to express the fundamental solutions for the slow and fast diffusion equations; see, e.g., [Che+17], [CHN19], [CE22], [CH22], [CGS22], [MN15].
